ABOUT PPBM

Pacific Power Building Maintenance (PPBM) is a fast-growing company in the United Arab Emirates, which has the highest level of customer care, technical support on all products and quick attendance to all emergency calls.

We are approved by Dubai Civil Defense to provide all services related to Inspection, Installation Testing & Commissioning, Maintenance and Certification of the entire range of fire prevention systems. Every client considered a business partner to be benefited from the most suitable risk management solution by our expertise and experience with high-quality products and services in engineering, installation and maintenance of fire safety and firefighting systems across the UAE.

We are specialized in undertaking and executing multi-contracts for prevention service in Multi Storey Residential buildings and Towers, Hotels, Education Institutions, Banks, Shopping Malls and outlets, Commercial and Industrial warehouses, and offices.

Our dedication is to meet our clients' full satisfaction in providing the complete package suit. We are available 24x7x365 to expeditiously respond to all our clients' calls, site surveys, emergency incidents, technical meetings regarding all related fire systems and prevention tips for update on latest technical and design solutions as per UAE Law and NFPA standards.

Our dedication is to meet our clients' full satisfaction in providing the complete package suitable to their specification and budget from the basic conventional system to an addressable system, such as:

- Supply Only
- Design, Supply & Commission
- Design, Supply, Install & Commission
- System Maintenance
- Insulation Contracting
- Plumbing & Sanitary Installation
- Electrical Fittings & fixtures, Repairing & Maintenance
- Painting Contracting
- Air Conditioning, Ventilation & Air Filtration System Installation & Maintenance
- False Ceiling & Light Partitions Installation
- Satellite Receiving Equipment Installation & Maintenance
- Electromechanical Equipment Installation and Maintenance

At PPBM, we are committed to:

- Continuous improvement in customer service
- Delivering premium quality and reliable products and solutions
- Research and development to drive new product innovation
- Employee engagement and satisfaction through workplace improvement programs
- A safe and friendly working environment for all employees, customers and visitors

4 |

5

MISSION

To have a reasonable fire hazard-free environment for the people of the United Arab Emirates through fire alarm and Fire Fighting solution package.

VISION

To efficiently and effectively serve our clients with reliable, competent and consistent support to be accomplished by "99% Can-Do Personnel" in Installation and Maintenance of fire equipment.

QUALITY MANAGEMENT

It is the policy of **Pacific Power Building Maintenance (PPBM)** that all of our activities are carried out in accordance with our quality management system, which is working towards ISO 9001:2015.

PPBM quality management system manual sets out the organization and arrangement of the company management systems.

The quality management system contains all the procedures and associated documentation to manage and control our business and is available to all staff.

The aim of our quality management system is to ensure that:

- We deliver a quality product to maintain excellent customer relations.
- Customer satisfaction remains inherent to our business
- Our Customers' requirements have been fully understood and met
- All products are carried out consistently to a defined standard
- We have the skills and resources to fulfil our customer requirements
- We strive to continuously improve our systems and procedures
- We only use services that meet our own quality assurance standards
- A professional approach to customer interface is maintained at all times
- Any complaints are dealt with efficiently and within an acceptable time period

PPBM recognizes the importance that the quality of our service has to the future of our business.

Quality is a degree of excellence, which is ever changing. Every member of staff is involved in managing how we can improve today, tomorrow and long into the future.

From the smallest procedure to the largest contact, quality is our passport to customer satisfaction and to our future business.

This quality policy statement has been implemented into the PPBM management system and will be reviewed at regular intervals.

SOLUTIONS & SERVICES

FIRE FIGHTING & PUMP SYSTEMS

WET CHEMICAL EXTINGUISHERS
Wet chemical fire extinguishers are a new innovation in the fire industry. Cooking appliances are the biggest single source of accidental fire in the workplace. With this in mind and wet chemical solution, the most effective means of extinguishing fires involves deep fat fryers. The solution cools and emulsifies when applied to burning fats and oils. This seals the surface and prevents re-ignition of the fire. Wet chemical extinguishers also have A class fire rating.

It is vital to ensure that you have the correct extinguisher for your premises. If you are unsure what would be most appropriate for your environment, our fully trained, highly experienced team can provide you with expert knowledge and assist you in deciding what is most applicable for you.

FIRE HOSE REELS
Hose reels are available in fixed, swinging, recessed. They are ideal for large high risk environments such as:

- Schools
- Hotels
- Car Parks
- Warehouse & Workshops
- Factories
- Theater and Concert Halls

Hose reels are suited to large areas or corridors where a fire extinguisher may not provide adequate cover, and are often required by fire certificate or insurers. A fire hose reel unit is a circular drum typically holding a hose with a fully adjustable nozzle. The drum is bracketed to a wall and is normally fed via the local water authority supply into the building; this then feeds an integrated system of pipe work connecting strategically positioned hose reels.

FIXED
Both manual and automatic reels have separate wall mounting plates for easy installation or replacement. A beaded hose guide allows the hose to be drawn out easily in any direction.

SOLUTIONS & SERVICES

FIRE FIGHTING & PUMP SYSTEM

SWINGING
Swinging hose reels normally hang to the left of the hinge but can be swung through 180 degrees.

RECESSED
Recessed hose reels are mounted with the support bracket to the left of the reel to swing through 180 degrees.

Annual servicing ensures a hose reel work first time, every time and prevents potentially damaging leaks. We provide routine servicing and maintenance as required by current guidelines. For a quotation for fire hose reel supply and installation or to arrange servicing and maintenance, please contact us.

FIRE PUMPS
Fire Pumps are required when the water pressure and volume available from the local main supply is not sufficient to meet the hydraulic design requirements of a fire sprinkler system. This is often the case in high rise buildings or when a high rise building or when a high sprinkler head pressure is required to generate a high volume of water from the sprinkler, for instance in storage warehouses. They are typically used to pump water into the fire sprinkler system from a static tank or reservoir. A small jockey pump maintains the static pressure in the sealed fire sprinkler system so that when a sprinkler is activated, the pressure drop is sensed by the fire pump automatic controller which causes the fire pump to start. As well as providing a wide range of suitable pumps for use with water storage tanks.

SOLUTIONS & SERVICES

CENTRAL BATTERY, EMERGENCY AND EXIT LIGHTING SYSTEM

SAVE MONEY NOW WITH INTELLIGENT, LOW-VOLTAGE, LED EMERGENCY LIGHTING

Exit signs are designated to be absolutely noticeable and understandable to anyone, which generally shows the work "EXIT" or its equivalent in the local language, and some are in pictogram with or without text supplement. In the event of power failure, the emergency lighting fittings are provided for a minimum period of three hours. The emergency lighting will also leads to escape routes through directional arrows.

We can also supply, install and service a large range of "Emergency Luminaires & Fire Exit Signs", which consist of:

- Self-Contained Conversion Packs
- Self Test Units
- Central Battery
- Static Converter
- Uninterrupted Power Supply
- Addressable Lightings Systems

Emergency light testing must be carried out on quarterly basis as required by UAE Law. Maintenance is conducted simultaneously with fire alarm system maintenance to economize.

SOLUTIONS & SERVICES

ANNUAL MAINTENANCE CONTRACT

MAINTAINING RELIABLE FIRE PROTECTION MEASURES-WE'RE AT YOUR CALL 24 HOURS A DAY, 7 DAYS A WEEK

PPBM responsibility does not end with the sale or installation. After-sales service is a very important aspect in our business. Our dedicated team and enough stocks of necessary spare parts warrant the life-long service to our clients. Said maintenance contract includes 24-hour site support with periodic preventive maintenance inspection of the system.

Upon system installation, testing and commissioning by our engineers, we issue, maintain and conduct the following:

- Fire Alarm Diagram Zonal Chart
- Commissioning Certificate

Fire alarm log book in which all events/maintenance visits and other relevant details are noted.

Regular testing and service to ensure compliance as per UAE Law Availability for on-call-service through our office telephone number which is manned 24x7.

PPBM team coordinates with 24x7 DCD technical team for proper and full connection of fire alarm control panel to 24x7 Direct Alarm System.

Where you belong

ABOUT US

Jethani Group is one of the prestigious companies in Pune dealing with multiple business activities like manufacturing, investments, real estate development of residential and industrial projects.

The primary business of the company, i.e. manufacturing, was established in 1982, in M.I.D.C. Bhosari. Besides dealing in real estate and construction, the group is also venturing in land investment in Pune since 2003.

The group is exploring its development in real estate and has successfully executed around 1.2 million square feet construction in PCMC & M.I.D.C. Bhosari.

Jethani Group has always laid enough emphasis on quality, timely delivery of the services and customer satisfaction because we as a group believe that the success of the company depends on the quality of services and devotion toward achieving excellence.

ABOUT THE PROJECT

Your search for the perfect home ends here. Welcome to Trinity Greens! Located in Pune's western region Trinity Greens offers the best lifestyle amenities, security system and intelligently designed 2 and 3 BHK residential apartments all in one beautiful package. We use the best construction techniques and quality materials to enhance safety.

Its not just adults who'd be impressed, we've thought of the little ones too. There is something to do for everyone here at Trinity Greens. Living in Pune couldn't be more easier. Be it shopping or hanging out, it's all a stone's throw away. With relentless development the area is very well connected. So come, live a wonderful life!
